

ECON-O-GLIDER®

Pressed Steel Centralizer

Product

The Econ-O-Glider is a pressed steel spiral blade centralizer that has been specifically designed to centralize casing being run in the less demanding vertical & intermediate wells, where positive standoff is required, and torque & drag reduction is not deemed a critical requirement.

Features

- Positive standoff spiral blade
- Maximum flow-by
- Blades tested to withstand 15-20 tons side loading

Options

- Dedicated engineering support team
- Centralizer placement / T&D analysis available
- Econ-O-Glider ST (Straight Blade) available
- Integral set screw option (ST only)
- Size range from 2-7/8" – 30"
