

COREBIT™

The Ultimate COREBIT Designed
Specifically for Your Application

Every COREBIT application is unique and Varel leads the way in COREBIT technology with PDC bit design features and optimized hydraulics for every design.

Application

- For every core barrel design as each bit is customizable to the core barrel required.
- For soft to hard formation coring.

Features / Benefits

- PDC cutters, TSP, Natural Diamond, and Impregnated cutting structures available on request depending upon the formations to be cut.
- Hydraulically optimized for each cutting structure and formation application.
- Balanced cutting structure with PDC cutters and full coverage designs with TSP, Natural Diamond, and Impregnated are standard.
