

8 3/8" FUSION 613P – SR-584

**PDO Rig 110 and VAREL teams sets an impressive run for 8.375" section in SAIH-RAWL Field
Longest run in the lower part of the section. Saving 1 Trip vs previous best run.**

CUSTOMER CHALLENGE

Drilling through interbedded formation which composed mainly of massive body of sandstone and shale. Usually used 2-3 bits to tackle the lower part of the section from GHUDUN until lower MIQRAT formation. The joint effort of PDO and VAREL team came together by running 8.375" F+613 with VENOM cutters technology to overcome this challenge.

VAREL SOLUTION

This achievement was made by capitalizing on the FUSION+ technology in the 8.375" F+613P2DGX VAREL PDC bit to push the limits of performance and saving 2 bits trip.

VAREL VALUE

- Total Footage **1029 m** with ROP **3.8 m/hr.**
- **27% longer metrage** vs previous best performance.
- **10 % ROP improvement** vs average offset.
- Bit came out in **excellent condition** while drilling to TD.
